

Gravitas Workload- The First 1000 Cases

Gravitas is one of the most experienced bariatric surgical units in the United Kingdom. We specialise in laparoscopic (keyhole) operations.

We have performed over 1000 cases and offer all types of bariatric surgery including the duodenal switch.

Our work has been presented both nationally and internationally in prestigious surgical conferences.

We sponsor a national bariatric fellowship to train the next generation of bariatric surgeons.

The next few slides demonstrate some of our outcomes and our excellence in bariatric surgery.
